a3-402-04@a3-402-04:~/Desktop/WADLAnkur$ ng new WADLAssignment2 --no-standalone
? Would you like to enable autocompletion? This will set up your terminal so
pressing TAB while typing Angular CLI commands will show possible options and
autocomplete arguments. (Enabling autocompletion will modify configuration files
in your home directory.) No
Ok, you won't be prompted again. Should you change your mind, the following command will set up autocompletion for you:

  ng completion
? Would you like to share pseudonymous usage data about this project with the
Angular Team
at Google under Google's Privacy Policy at https://policies.google.com/privacy.
For more details and how to change this setting, see https://angular.io/analytics. Yes
Thank you for sharing pseudonymous usage data. Should you change your mind, the following
command will disable this feature entirely:

  ng analytics disable --global
